CONCERT WP5: Stakeholder involvement and communication in radiation protection research

Simon Bouffler
DH-PHE, WP5 Leader

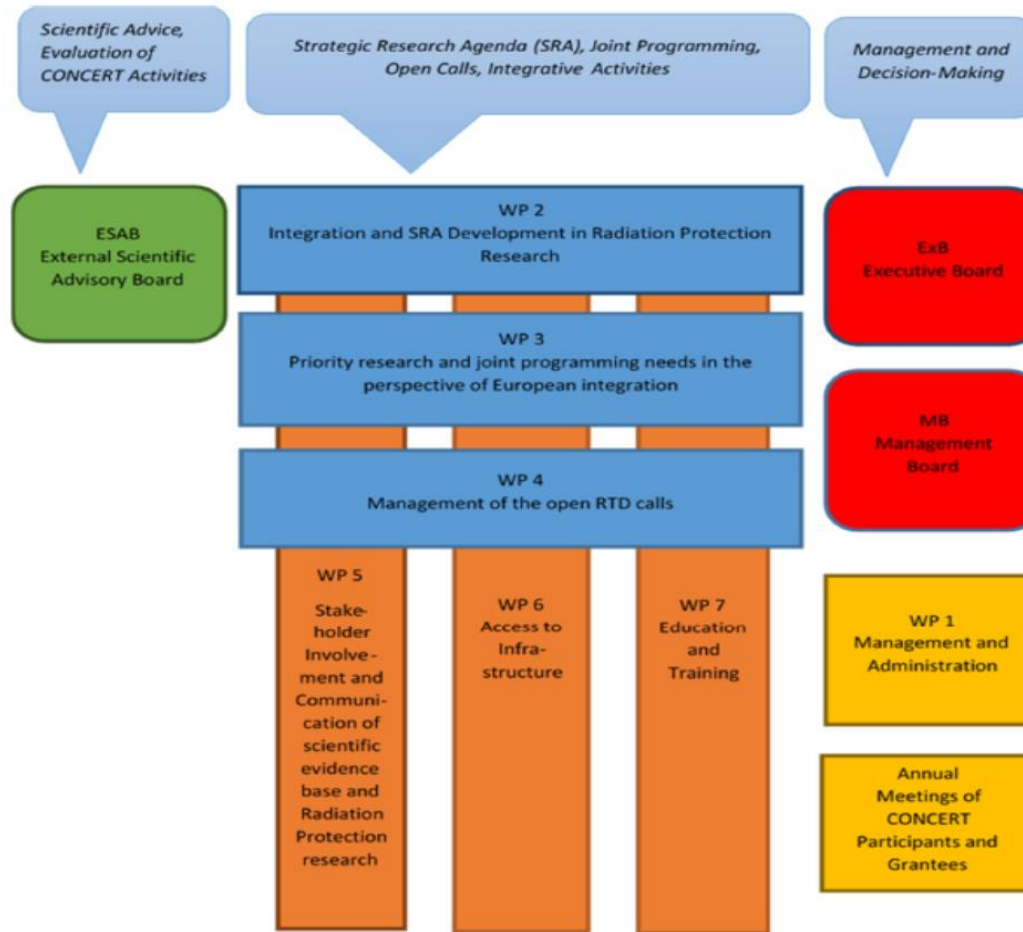

Aims of WP5

- To establish mechanisms for public and societal stakeholders to have a say in developing research priorities (link to WP5)
- To establish routes to inform and educate public and societal stakeholders on the scientific basis of radiation protection (link to WP1)
- To provide consistent and clear information on implementation of radiation protection standards in Europe (link to WP1)

WP5 as part of CONCERT

WP5 Tasks

- 5.1 Strategy for public and societal stakeholder engagement (DH-PHE lead)
- 5.2 Establishing a stakeholder group (IRSN lead)
- 5.3 Interaction with civil society including use of social media (ISS lead)
- 5.4 Development of general and specialist information for the CONCERT website (DH-PHE, SCK-CEN lead)

WP5 Partners and key people

DH-PHE – Simon Bouffler, Antony Bexon, Svetlana Carr

IRSN – Francois Rollinger

SCK•CEN – Nathalie Impens, Kristine Leysen, Tanja Perko

STUK – Sisko Salomaa, Liisa Sirkka

ISS – Mauro Grigioni

VUJE – Tatiana Duranova

NMBU – Deborah Oughton

All platforms

Task 5.1

Drafting a Strategy for engagement with public and societal stakeholders

- DH-PHE lead
- Discussion with key partners
- Draft anticipated M8
- Posted on CONCERT website M12
- Project deliverable D5.1

Task 5.2

Establishing a stakeholder group

- IRSN lead
- To provide a route for stakeholders to build their own opinion and to be heard within CONCERT
- To provide input to identify areas of concern where further information or research could be beneficial
- Draft Terms of Reference (M12)
- Appoint Chair and panel members (M12)
- Anticipate input relevant to WP3 (call priorities) and WP1 (website content)

Task 5.3

Interaction with stakeholders and use of social media

- ISS lead
- Develop and launch a public facing eSurvey
 - gauge risk perception
 - what information would be beneficial?
 - which areas to research?
- Consider use of social media drawing on experience elsewhere
- Project deliverable D5.2 – launch of eSurvey

Task 5.4

Development of website information

- DH-PHE, SCK-CEN lead
- Aim to provide reliable and trusted information for a wide audience on radiation risk and radiation protection
- Topics to include will be informed by stakeholder panel and eSurvey
- Start small and grow over time
- Utilise existing web resources where available
- Also develop more technical information on implementation of radiation protection standards

Who are our stakeholders?

International bodies: ICRP, UNSCEAR, WHO

The scientific community

Users of radiation

- In the medical field : radiographers, medical practitioners
- In Industry : nuclear workers, radiographers, ...
- Related to emergency situations : site remediators, emergency planners, waste disposal

Concerned citizens and NGO

- around nuclear site and beyond
- medical patients
- high radon home inhabitants
-

Public Health
England

Who is responsible?

....the entire CONCERT partnership....

Public Health
England

Thanks for your attention
