

MELODI Workshop on non-cancer effects of ionizing radiation 10-12 April 2019, SITGES, SPAIN

Announcement

The MELODI Workshop on non-cancer effects of ionizing radiation will be held on 10-12 April 2019 at [Hotel Port Sitges](#), in the town of Sitges (situated 20 minutes south of Barcelona El Prat (BCN) airport).

The workshop will consist of 1.5 days of presentations

and 1 day of discussion, with the final objective of writing position papers.

The presentations will be organised into 5 sessions:

- cardiovascular/cerebrovascular effects,
- effects on the eye,
- cognitive effects,
- effects on the immune system,
- effects on the metabolic system.

Each session will cover clinical, epidemiological and experimental aspects.

The workshop is sponsored by the European [MELODI](#) (Multidisciplinary European Low Dose Initiative) Association and the [CONCERT](#)-European Joint Programme for the Integration of Radiation Protection Research (a project financed by EURATOM under Horizon 2020). It is hoped that the outcome of this workshop will provide useful information and recommendations for the setting of priorities in low dose radiation protection research.

Participation is restricted to 55 persons on a first come first serve basis.

Remote attendance via GoToMeeting will be feasible

Please contact MELODI_workshop2019@isglobal.org for information.
