This workshop will address

- the effects of radiation on immune cells homeostasis and function, in healthy and pathological conditions,
- the effects of radiation on senescence, immunosenescence and organismal ageing,
- The direct (cell autonomous) and indirect (bystander) effects of radiation,
- The importance of radiation quality for radioprotection, medicine and space biology/travel,
- The dose/dose-rate relationship to effects (chronic vs acute, UHDR/Flash effect).

Organizing Committee: Serge Candéias, Umberto Galderisi, Florence Miller, Katalin Lumniczky, Udo Gaipl, Benjamin Frey

Registration fee: 170 €

Important dates:

Abstract submission: February 27, 2026

Registration: March 13, 2026
